

- what do I want to learn or understand better?
  - The team got the Semcon emulator to work. I still need to be able to write a piece of code. I have not spent much time on this recently. I just need to look into it.
- how can I help someone else, or the entire team, to learn something new?
  - I don't know how I can help a team members or the team as a whole to learn something new.
- what is my contribution towards the team's application of Scrum?
  - Since most team members have started coding the subject of code specifics very often creeps into the conversations during meetings. I am doing my best to try to remind people what we are here to do and guide people them in the right direction. Most effectively, which I try to do is to either just continue the conversation about the subject at hand or simply start writing the reflection myself, leading by example.
- what is my contribution towards the team's deliveries?
  - I have not contributed any code this week. I need to start coding more.
