

- what do I want to learn or understand better?
 - I still have not spent much time on the task of writing some code, because I have had deadlines in another course. I need to get more familiar with git to be able to try out team members' code and collaborate better.
- how can I help someone else, or the entire team, to learn something new?
 - I can help others by helping myself, i.e. starting to code.
- what is my contribution towards the team's application of Scrum?
 - I continue to have the role as SCRUM master and tried very hard to get all our user stories up and break them into tasks. This is mostly done, but the important part of estimating the tasks was not finished. We need to have this done when we start the next sprint. And when that sprint is done we should aim to have a PSPI.
- what is my contribution towards the team's deliveries?
 - I have not contributed any code this week. I need to start coding more. See first question for the reason.
