- what do I want to learn or understand better?
  - I have a poor understanding of SCRUM and Android development. I want to be able to have a working knowledge of these topics. I will attend lectures and exercises to get better. I will play around with Android Studio and look at the book "Scrum and XP from the trenches.
- how can I help someone else, or the entire team, to learn something new?
  - Since I barely know anything at this point I will focus on gaining knowledge myself first.
- what is my contribution towards the team's application of Scrum?
  - Just showing up is half the battle! Continuing, I would like to strive towards being positive influence on the team. By pointing out when we reach milestones and giving praise and compliments when members move the team forward.
- what is my contribution towards the team's deliveries?
  - In the lego exercise I worked on the police car and eventually got it approved. It was mainly built by me, but other team members fetched pieces upon my request. I would like to be able to contribute in this way to my fellow team members.
